EDUCATION

Bachelor of Science (BSc), Computer Science and Business Administration **2025**

Saint Mary's University, Halifax, NS

Pre-University Arts and Social Science, Cape Studies **2021**

Brown's Town Community College, St. Ann, Jamaica

PROJECTS

Web Developer – Intern (Fall Co-op) **2023**

Lucas Technology & Analytics, Pictou NS

- Created a report using Power BI Report Builder to display the website inventory hosted by the company. Utilized data from various databases created using SQL and displayed it in the form of a table.
- Developed code using C# to embed the report in an ASP.Net razor page for users to view and allow for the user to dynamically switch between multiple reports.
- Managed twenty-six websites hosted by Lucas Technology by removing inactive domains from the server and updating documentation on how to do this.
- Utilized WampServer64 to recreate the removed websites to ensure that they could be used to create a new website if needed. Ensured that the correct GA4 and GTM tags for the websites were updated and correct. Created SSL certificates using the Microsoft Azure platform to install on the various websites.

Web Developer **2023**

Mobile App Development, Saint Mary's University, Halifax NS

- Collaborated in a group of four to develop a computer game for children ages 5-6 to learn the Mi'kmaq words using HTML drag and drop API, bootstrap grid system, JavaScript, CSS, and the jQuery library.

Software Developer **2021**

Computer Science, Brown's Town Community College, St. Ann, Jamaica

- Created a software for a local community health centre to keep records of their patients and employees using the C programming language. Software was developed to meet the requirements of the health centre, including storing a patient's name and past medical history, along with information for next of

kin. The system allowed a user to add, update, delete and view all patients as well as employees. Resulted in the health centre having a new system for storing employee and patient information.

Researcher

2021

Management of Business, Brown's Town Community College, St. Ann, Jamaica

- Created and conducted a survey with employees at a local golf course to acquire the information needed to complete a research project on how various leadership styles affected employee motivation.
- Analysed the data collected to create various graphs to present the results found based on survey findings, then conducted further research using secondary sources such as journals to create an interpretation of results.

PROFESSIONAL EXPERIENCE

Web Developer – Intern (Fall Co-op)

2023

Lucas Technology & Analytics, Pictou NS

- Managed the backend of websites using SQL Server and MySQL to ensure that the source code was updated and correct.
- Created and maintained the internal documentations for different procedures related to website management for future use.
- Interacted with various content management systems such as Umbraco and Joomla! to troubleshoot and promptly respond to errors, resulting in the websites being secure, fully functional, and up to date.
- Utilized Power BI to create interactive reports to display the status of the websites. Reports were used by the development team to keep track of the status of the websites.

Sales Associate

2023

Sea House, Halifax NS

- Excellently communicated with customers about various sales promotions and prices.
- Aided team members during rush hours to ensure that customers were served in a timely manner and teammates were not left feeling overwhelmed.
- Maintained the cleanliness of the store during the lull to further enhance the customer's experience.

Cast Member

2022

Cineplex Cinema, Park Lane Mall, Halifax NS

- Provided excellent customer service to guests in a fast-paced environment, through ensuring customers received food and movie tickets in a timely manner.
- Effectively communicated in a friendly way to patrons, took orders with accuracy, as well as made menu recommendations.

COMMUNITY INVOLVEMENT

Administration Assistant – Volunteer

2018

GGFM Radio Station, St. Ann, Jamaica

- Accurately catalogued documents and reorganized the filing system for the managers, allowing managers and employees to easily retrieve files when needed.
- Scanned, copied, and retrieved files for supervisors and other colleagues when requested to improve workflow in the office.
